

REMARKS

Applicants have now had an opportunity to carefully consider the Examiner's comments set forth in the Office Action of February 18, 2009.

Applicants' base claim has herein been amended to now recite that a first control element is shown on a screen having a plurality of activatable areas corresponding to a subset of a set of present feature values and inactivatable areas corresponding to a second screen associated with respective preset feature values and that in response to the completion of the automated procedure, each of the preset feature values within the set of preset feature values has an activatable area associated therewith.

The above amendment to the claims has added the features of the graphical user interface relating to the presentation of inactivatable and activatable areas on the screen which are deemed to clearly distinguish Applicant's method from the cited reference.

Accordingly, withdrawal of the rejection and allowance of the claims is hereby requested.

CONCLUSION

For the reasons detailed above, it is submitted all remaining claims (Claims 1, 3-11) are now in condition for allowance. The foregoing comments do not require unnecessary additional search or examination.
